

Honeyville

**Economy & Bulk
Feed Bins**

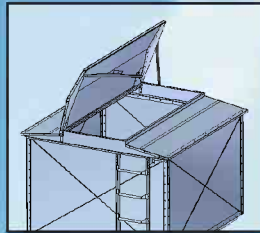

6 Sizes from 1.5 Ton to 10 Ton

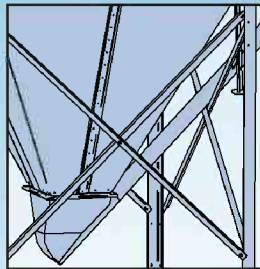

Economy Bins

MODEL	CAPACITY	WIDTH	HEIGHT
4RD15	1.5 TON	51"	8' 10"
4RD20	2.0 TON	51"	11' 3"

LID IN OPEN POSITION

Large 3'x6' opening.
Most easily filled bin on the market. Lid can be opened or closed from ground level.

- Adjustable Free Flow Plastic Feed Bin Boot & Auger
- Manual Slide Gate (option)

Bulk Bins

MODEL	CAPACITY	WIDTH	HEIGHT
6FD3	3.5 TON	6' 3"	11' 5"
6FD5	5.3 TON	6' 3"	13' 5"
6FD8	8.3 TON	6' 3"	17' 5"
6FD10	10.0 TON	6' 3"	21' 5"

HONEYVILLE Economy Bins have a full 51" top opening for filling of bin with a hinged galvanized spun cover. These bins have a 52° center draw hopper and will handle free-flowing feeds such as hog or low fat poultry feeds and pelleted products.

HONEYVILLE Square Bins give the advantages of more capacity with a much lower filling height. These all steel bins will not absorb fats and moisture, therefore, feed comes out as fresh as the day it was put in.

BINS AND LEG STRUCTURE are fully assembled at the factory with anchor base plates, ladders and 16"x16" poly boot. This boot is adjustable from 20° to 50° to accommodate differing auger heights. Also available is the easily operated hand slide.

HONEYVILLE bin bodies are manufactured from 16 and 18 gauge galvanized steel. The hopper is constructed of 14 gauge galvanized steel with smooth die formed corners. All seams are caulked and bolts have plastic washers.

The 60° center draw hopper was designed for easy unloading of average to harder flowing material. The Free-Flowing Adjustable Boot can be adjusted from 20° to 50° to meet every auger height requirement. Free-Flow Boot keeps the feed moving.

Fully Assembled Galvanized Steel Construction
