Dust Collection

Premier Industrial Dust Collection Systems

HF SERIES MATERIAL HANDLING FANS

- 500 – 58,500 CFM
- 3 – 300 HP
- 6" – 41" Inlet Size

HAL SERIES FLEX TIP ROTARY AIRLOCKS

- 8" – 24" Diameter
- ¼ – 3 HP

DUSTOP SERIES Self-Contained Dust Collectors

- 875 – 6,500 CFM
- 3 – 20 HP

CYCLONES, BINS, & FILTERS

- Cyclones 575 – 57,000 CFM
- Bins 230 – 672 cubic ft.

WELDED SKIRTED HOPPER TANKS

- 770 – 5,770 cubic ft.
- 8' – 13' Diameter

SF SERIES SHAKER FILTERS

- 1,000 – 6,000 CFM
- 204 – 920 sq. ft. Cloth Area

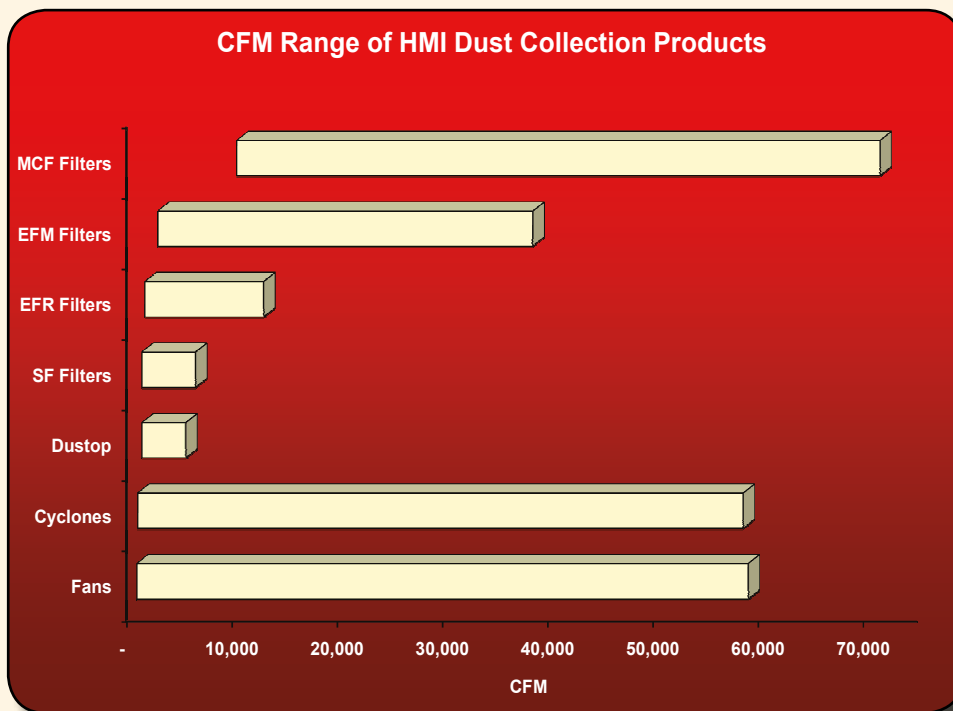

MCF SERIES FILTERS

- 9,000 – 57,400 CFM
- 1,133 – 7,177 sq. ft. Cloth Area

EFM SERIES FILTERS

- 3,100 – 31,000 CFM
- 387 – 3,870 sq. ft. Cloth Area

EFR SERIES FILTERS

- 1,050 – 10,000 CFM
- 131 – 1,250 sq. ft. Cloth Area

INSIDE DUST COLLECTION TRUNK-LINE

Honeyville Metal manufactures manifolds, trunk-line lock-seam pipe, inlets, elbows and machine adapters.

DOUBLE TRAILER LOAD-OUT

Honeyville Metal designs a single, double, and triple semi trailer load-out system. This is just one of several types of storage.

HONEYVILLE METAL INC.

Honeyville Metal has been in the steel fabrication business since 1951. After numerous additions and expansions, Honeyville now has a total of 191,000 sq. ft. of office, warehouse and manufacturing area.

Honeyville Metal manufactures a complete line of fans, cyclones, baghouse filters, airlocks, storage bins, trunk-line and other components for the dust collection industry. Our equipment is currently being used in seed houses, feed mills, and for various types of dust in the woodworking industry. Nearly all the components that make up an HMI dust collection system are manufactured in our plant. Our facility is well equipped with up to date metalworking machinery, including a CNC plasma cutter, turret punch, press brakes, shears and rolls.

Honeyville Metal dust collection equipment is being used across the United States, and is also being put into containers to export into other countries. Serving our customer base is just as important to us today as it was over 50 years ago at our beginning.

ENGINEERING systems to give you air to cloth ratios that you can work with. We target below a 10:1 ratio, to give you the best possible dust collection from your Honeyville System.

INSTALLATION offered to give you a complete quality system. HMI has a factory trained installation crew available to install your new Honeyville system that will give you the final product that you deserve.

LARGE INVENTORY of parts, components and accessories. Honeyville Metal stocks many common sizes of elbows, inlets, tapers, adapters, and of course suction and blow pipe, most of which can be picked up or shipped within 24 hours.

SERVICE is a quality that Honeyville Metal takes seriously. We are only a phone call away to help you trouble shoot your problem or send one of our technicians out to your site to help solve the problem you are experiencing.
